Yuba County Water Agency, Project No. 2246-001

Order Approving Dissolved Oxygen Monitoring Plan

(Issued April 16, 1986)

Kenneth M. Pusateri, Acting Director, Office of Hydropower Licensing.

On September 24, 1985, the Yuba County Water Agency (licensee) filed and supplemented on March 7, 1986, a dissolved oxygen (DO) monitoring plan as required by Article 63 of the order amending license for the Bullards Bar Dam Hydroelectric Project. The Central Valley Regional Water Quality Control Board, California Department of Fish and Game, and the U.S. Fish and Wildlife Service concur with the licensee's plan.

The licensee's proposed plan to monitor DO discharge concentrations will insure the maintenance of state water quality standards.

The Director orders:

(A) The dissolved oxygen monitoring plan filed on September 24, 1985, and supplemented March 7, 1986, pursuant to Article 63 of the order amending license for Project No. 2246-001, is approved.

(B) This order is issued under authority delegated to the Director and is final unless appealed to the Commission under Rule 1902 within 30 days from the date of this order.
