Yuba County Water Agency, Project No. 2246-023 - California

Order Approving Revised Exhibits

(Issued May 24, 1993)

J. Mark Robinson, Dir., Division of Project Compliance and Administration.

On April 26, 1993, and supplemented on May 17, 1993, the Yuba County Water Agency, licensee for the Yuba River Project, FERC Project No. 2246, ¹ filed revised exhibits K and L. The licensee submitted the revised exhibits K and L to show the location of a proposed guard valve to be installed on the penstock which delivers water to the New Colgate Powerhouse.

The proposed guard valve would be located about 40 feet downstream from the connection point of the power tunnel and the penstock where there is an existing "roll-out" section of the penstock. In the April 26, 1993 filing, the licensee explains that the penstock presently does not contain a guard valve and that the valve is a proposed improvement to the project. The guard valve would minimize the outage time required for maintenance on the penstock.

The revised exhibits K and L conform to the Commission's rules and regulations. This order does not authorize a change in the installed capacity or amend the annual charges for the Yuba River Project.

The Director orders:

(A) The revised exhibit K-10-A, filed on May 17, 1993, is approved and made a part of the license. The superseded exhibit is eliminated from the license.

[64,323]

FERC Exhibit	FERC Drawing Number	Drawing Title	Superseding
K-10-A	2246-144	Tunnel Plan, Profile and Sections	2246-101

(B) The revised exhibit L, filed on April 26, 1993, is approved and made a part of the license. The superseded

exhibit is eliminated from the license.

FERC Exhibit	FERC Drawing Number	Drawing Title	Superseding
L-24	2246-143	New Colgate Project Map	2246-138

(C) Within 90 days of the date of issuance of this order, the licensee shall file an original and two duplicate aperture cards of the approved drawings. The original should be reproduced on silver or gelatin 35-mm microfilm. The duplicates are copies of the originals made on Diazo-type microfilm. All microfilm should be mounted on a type D (3 1/4" x 7 3/8") aperture card.

Prior to microfilming, the FERC Drawing Number (2246-143 and 2246-144) shall be shown in the margin below the title block of the approved drawing. After mounting, the FERC Drawing Number should be typed on the upper right corner of each aperture card. Additionally, the Project Number, FERC exhibit (i.e., L-24, K-10-A), Drawing Title, and date of this order should be typed on the upper left corner of each aperture card.

The original and one duplicate set of aperture cards should be filed with the Secretary of the Commission. The remaining duplicate set of aperture cards should be filed with the Commission's San Francisco Regional Office.

(D) The licensee shall commence installation of the penstock guard valve within 2 years from the date of issuance of this order and shall complete installation within 3 years from the date of issuance of this order.

(E) This order constitutes final agency action. Requests for rehearing by the Commission may be filed within 30 days of the date of issuance of this order, pursuant to 18 C.F.R. §385.713.
