Yuba County Water Agency, Project No. 2246-031

Order Relabeling Exhibits

(Issued April 16, 1996)

J. Mark Robinson, Dir., Division of Project Compliance and Administration.

On March 21, 1996, Yuba County Water Agency, licensee for the Yuba River Project, FERC Project No. 2246, filed a letter requesting the relabeling of active exhibit drawings to clarify discrepancies with the cataloging of previously approved project exhibit drawings.

Review

During our review, we found that the drawings approved in the Commission's May 9, 1985 and May 24, 1993 orders ¹ were mislabeled. The drawings in the May 9, 1985 order were assigned duplicate drawing numbers and the drawings in the May 24, 1993 order have mislabeled exhibit numbers.

These discrepancies created confusion in determining which drawings were active, and which drawings have been superseded and deleted from the license. To clarify the project record, this order will assign new drawing numbers to the drawings approved in the May 9, 1985 and May 24, 1993 orders and identify all active approved exhibit drawings for the Yuba River Project.

The new drawing number assignments will not change any project operations or project features for the Yuba River Project.

The Director orders:

(A) The following exhibit numbers are being assigned to the drawings approved in the May 9, 1985 and May 24, 1993 orders. The licensee is not required to submit new aperture cards for the following exhibit drawings.
