

Table of Contents
Description

Section No.	Description	Page No.
1.0	Introduction.....	E1-1
1.1	YCWA’s Application for a New License	E1-1
1.2	Purpose of Action and Need for Power	E1-7
	1.2.1 Purpose of Actions	E1-7
	1.2.2 Need for Power	E1-8
1.3	Statutory and Regulatory Requirements	E1-8
1.3.1	Migratory Bird Treaty Act of 1918.....	E1-10
1.3.2	Federal Power Act of 1920	E1-11
	1.3.2.1 Section 4(e) Conditions.....	E1-11
	1.3.2.2 Section 10(a) Recommendations	E1-12
	1.3.2.3 Section 10(j) Recommendations	E1-12
	1.3.2.4 Section 18 Fishway Prescriptions	E1-13
1.3.3	Bald and Golden Eagle Protection Act of 1940.....	E1-14
1.3.4	California Fully Protected Species Statutes (1957)	E1-14
1.3.5	National Historic Preservation Act of 1966.....	E1-15
1.3.6	Wild and Scenic Rivers Act of 1968.....	E1-17
1.3.7	National Environmental Policy Act of 1969.....	E1-18
1.3.8	Clean Water Act of 1970	E1-19
1.3.9	Clean Air Act of 1970.....	E1-22
1.3.10	California Environmental Quality Act of 1970	E1-23
1.3.11	Coastal Zone Management Act of 1972	E1-24
1.3.12	California Wild and Scenic Rivers Act of 1972	E1-24
1.3.13	Endangered Species Act of 1973	E1-25
1.3.14	Magnuson-Stevens Fishery Conservation and Management Act of 1976.....	E1-27
1.3.15	California Native Plant Protection Act of 1977	E1-28
1.3.16	Pacific Northwest Electric Power Planning and Conservation Act of 1980	E1-29
1.3.17	Wilderness Act of 1984	E1-30
1.3.18	California Endangered Species Act of 1984.....	E1-30
1.3.19	Forest Service’s Outdoor Recreation Accessibility Guidelines of 2006, and Architectural Barriers Act Accessibility Standards	E1-31
1.3.20	Americans with Disabilities Act of 2010.....	E1-31
1.4	Public Review and Comment.....	E1-31
	1.4.1 Scoping	E1-32
	1.4.2 Interventions	E1-33

Table of Contents (continued)

Section No.	Description	Page No.
1.4.3	Cooperating Agency Status.....	E1-33
1.4.4	Relicensing Studies.....	E1-33
1.4.4.1	FERC’s Determination on Revised Study Plan	E1-33
1.4.4.2	FERC’s Determination Regarding Study Disputes.....	E1-39
1.4.4.3	FERC’s Determination on Initial Study Report.....	E1-39
1.4.4.4	FERC’s Determination on Updated Study Report.....	E1-40
1.4.4.5	Study Status	E1-41
1.4.5	Comments on the Draft License Application.....	E1-43
1.4.6	Comments on the Final License Application.....	E1-44
1.4.7	Comments on the Draft Environmental Assessment	E1-45
2.0	Proposed Action and Alternatives	E2-1
2.1	No Action Alternative.....	E2-1
2.1.1	Existing Project Facilities	E2-1
2.1.1.1	New Colgate Development.....	E2-2
2.1.1.2	New Bullards Bar Minimum Flow Development.....	E2-7
2.1.1.3	Narrows 2 Development	E2-7
2.1.2	Existing Project Boundary	E2-10
2.1.3	Existing Project Safety.....	E2-11
2.1.4	Existing Project Operations	E2-11
2.1.4.1	Narrows 2 – Flow Transitions.....	E2-13
2.1.5	Existing Environmental Measures	E2-16
2.1.5.1	Measures in Current FERC License	E2-16
2.1.5.2	Measures in Other Licenses, Agreements and Contracts that Affect Operations.....	E2-19
2.2	YCWA’s Proposal	E2-26
2.2.1	Proposed Project Facilities.....	E2-26
2.2.1.1	Generation Facilities	E2-26
2.2.1.2	Non-Generation Facilities.....	E2-33
2.2.2	Proposed Project Boundary.....	E2-48
2.2.3	Proposed Project Operations.....	E2-52
2.2.4	Proposed Environmental Measures.....	E2-52
2.3	Alternatives Considered But Eliminated From Further Analysis	E2-54
2.3.1	Retire the Project.....	E2-54
2.3.2	Issue a Non-Power License.....	E2-54
2.3.3	Federal Agency Takeover of the Project	E2-55

Table of Contents (continued)

Section No.	Description	Page No.
2.3.4	Alternatives Proposed by Foothill Water Network in its DLA Comments	E2-55
3.0	Environmental Analysis.....	E3-1
3.1	General Description of the River Basin	E3-3
3.1.1	Existing Water Projects in the Yuba River Basin.....	E3-3
3.1.1.1	Yuba River Development Project	E3-3
3.1.1.2	South Feather Power Project.....	E3-3
3.1.1.3	Deadwood Creek Project	E3-3
3.1.1.4	Yuba-Bear Hydroelectric Project.....	E3-3
3.1.1.5	Francis Dam	E3-4
3.1.1.6	Drum-Spaulding Project	E3-4
3.1.1.7	Englebright Dam.....	E3-4
3.1.1.8	Narrows Project	E3-5
3.1.1.9	Wildwood Dam.....	E3-5
3.1.1.10	Scotts Flat Project	E3-5
3.1.1.11	Los Verjeles Dam	E3-5
3.1.1.12	Virginia Ranch Dam Project.....	E3-5
3.1.1.13	Hallwood-Cordua Diversion.....	E3-5
3.1.1.14	South Yuba-Brophy Diversion	E3-6
3.1.1.15	Browns Valley Diversion.....	E3-6
3.1.1.16	Daguerre Point Dam	E3-6
3.1.2	The River Basin	E3-6
3.1.2.1	North Yuba River Sub-basin.....	E3-11
3.1.2.2	Middle Yuba River Sub-basin	E3-12
3.1.2.3	South Yuba River Sub-basin.....	E3-13
3.1.2.4	Yuba River Sub-basin	E3-14
3.1.2.5	Feather River, Sacramento River and Delta	E3-15
3.1.2.6	Potentially-Affected Yuba River Stream Reaches.....	E3-16
3.1.2.7	Yuba River Basin Streams and Tributaries.....	E3-17
3.1.2.8	Yuba River Basin Dams.....	E3-18
3.1.3	Climate.....	E3-23
3.1.4	Major Land Uses.....	E3-24
3.1.5	Major Water Uses	E3-24
3.2	Scope of Cumulative Effects Analysis	E3-25
3.2.1	Geographic Scope for Analysis of Cumulatively Affected Resources	E3-25

Table of Contents (continued)

Section No.	Description	Page No.
3.2.2	Temporal Scope for Analysis of Cumulatively Affected Resources ...	E3-26
3.2.3	Past, Present and Reasonably Foreseeable Future Actions Considered for Analysis of Cumulatively Affected Resources	E3-26
3.2.3.1	Past and Present Actions	E3-27
3.2.3.2	Reasonably Foreseeable Future Actions	E3-27
3.3	Proposed Action and Action Alternatives.....	E3.3.1-1
3.3.1	Geology and Soils	E3.3.1-1
3.3.1.1	Affected Environment.....	E3.3.1-1
3.3.1.2	Environmental Effects	E3.3.1-28
3.3.1.3	Cumulative Effects.....	E3.3.1-34
3.3.1.4	Proposed Environmental Conditions	E3.3.1-34
3.3.1.5	Unavoidable Adverse Effects	E3.3.1-38
3.3.2	Water Resources	E3.3.2-1
3.3.2.1	Affected Environment.....	E3.3.2-1
3.3.2.2	Environmental Effects	E3.3.2-64
3.3.2.3	Cumulative Effects.....	E3.3.2-131
3.3.2.4	Proposed Environmental Conditions	E3.3.2-135
3.3.2.5	Unavoidable Adverse Effects	E3.3.2-141
3.3.3	Aquatic Resources	E3.3.3-1
3.3.3.1	Affected Environment.....	E3.3.3-2
3.3.3.2	Environmental Effects	E3.3.3-197
3.3.3.3	Cumulative Effects.....	E3.3.3-245
3.3.3.4	Proposed Environmental Conditions	E3.3.3-248
3.3.3.5	Unavoidable Adverse Effects	E3.3.3-258
3.3.4	Terrestrial Resources	E3.3.4-1
3.3.4.1	Affected Environment.....	E3.3.4-1
3.3.4.2	Environmental Effects	E3.3.4-31
3.3.4.3	Cumulative Effects.....	E3.3.4-73
3.3.4.4	Proposed Environmental Condition.....	E3.3.4-75
3.3.4.5	Unavoidable Adverse Effects	E3.3.4-81
3.3.5	Threatened and Endangered Species	E3.3.5-1
3.3.5.1	Identification of Potentially-Affected ESA-listed Species and Critical Habitat.....	E3.3.5-2
3.3.5.2	Consultation with USFWS, NMFS and Other Relicensing Participants.....	E3.3.5-6
3.3.5.3	Affected Environment.....	E3.3.5-10

Table of Contents (continued)		
Section No.	Description	Page No.
	3.3.5.4 Environmental Effects	E3.3.5-26
	3.3.5.5 Proposed Conditions	E3.3.5-30
	3.3.5.6 Unavoidable Adverse Effects	E3.3.5-37
3.3.6	Recreation Resources	E3.3.6-1
	3.3.6.1 Affected Environment.....	E3.3.6-1
	3.3.6.2 Environmental Effects	E3.3.6-39
	3.3.6.3 Proposed Conditions	E3.3.6-47
	3.3.6.4 Unavoidable Adverse Impacts	E3.3.6-55
3.3.7	Land Use	E3.3.7-1
	3.3.7.1 Affected Environment.....	E3.3.7-1
	3.3.7.2 Environmental Effects	E3.3.7-21
	3.3.7.3 Proposed Environmental Conditions	E3.3.7-23
	3.3.7.4 Unavoidable Adverse Effects	E3.3.7-26
3.3.8	Cultural Resources	E3.3.8-1
	3.3.8.1 Affected Environment.....	E3.3.8-1
	3.3.8.2 Environmental Effects	E3.3.8-19
	3.3.8.3 Proposed Environmental Conditions	E3.3.8-20
	3.3.8.4 Unavoidable Adverse Effects	E3.3.8-20
3.3.9	Aesthetic Resources	E3.3.9-1
	3.3.9.1 Affected Environment.....	E3.3.9-1
	3.3.9.2 Environmental Effects	E3.3.9-3
	3.3.9.3 Proposed Conditions	E3.3.9-5
	3.3.9.4 Unavoidable Adverse Impacts	E3.3.9-5
3.3.10	Socioeconomics Resources	E3.3.10-1
	3.3.10.1 Affected Environment.....	E3.3.10-1
	3.3.10.2 Environmental Effects	E3.3.10-13
	3.3.10.3 Proposed Conditions	E3.3.10-13
	3.3.10.4 Unavoidable Adverse Impacts	E3.3.10-13
3.3.11	Air Quality	E3.3.11-1
	3.3.11.1 Affected Environment.....	E3.3.11-1
	3.3.11.2 Environmental Effects	E3.3.11-4
	3.3.11.3 Proposed Environmental Conditions	E3.3.11-5
	3.3.11.4 Unavoidable Adverse Effects	E3.3.11-5
3.3.12	Noise	E3.3.12-1
	3.3.12.1 Affected Environment.....	E3.3.12-1
	3.3.12.2 Environmental Effects	E3.3.12-3

Table of Contents (continued)

Section No.	Description	Page No.
	3.3.12.3 Proposed Environmental Conditions	E3.3.12-3
	3.3.12.4 Unavoidable Adverse Effects	E3.3.12-3
4.0	Developmental Analysis	E4-1
4.1	Alternatives Considered in This Section.....	E4-1
4.2	Power and Developmental Benefits.....	E4-2
4.3	Comparison of Alternatives	E4-3
	4.3.1 No Action Alternative.....	E4-4
	4.3.2 YCWA’s Proposed Project Alternative	E4-4
5.0	Conclusions.....	E5-1
5.1	Comparison of Alternatives	E5-1
5.2	Comprehensive Development and Recommended Alternative	E5-1
5.3	Unavoidable Adverse Effects	E5-1
5.4	Consistency with Comprehensive Plans	E5-1
6.0	Literature Cited	E6-1
7.0	Consultation Documentation	E7-1

List of Figures

Figure No.	Description	Page No.
1.1-1.	Yuba River watershed in relation to the Feather River and other tributaries to the Sacramento River.....	E1-4
1.1-2.	Yuba County Water Agency’s Yuba River Development Project and Project Vicinity.	E1-5
2.1-1.	Our House Diversion Dam features.....	E2-2
2.1-2.	Log Cabin Diversion Dam features.	E2-3
2.1-3.	Longitudinal schematic of New Bullards Bar Dam on the North Yuba River and New Colgate Power Tunnel and Powerhouse on the Yuba River.	E2-5
2.1-4.	Longitudinal schematic of Narrows 2 Powerhouse Penstock and Powerhouse.	E2-9
2.1-5.	Yuba Accord North Yuba Water Year Type Index.	E2-21
2.1-6.	YCWA’s Member Unit service areas.	E2-24
2.2-1.	Schematic flow diagram for YCWA’s proposed New Colgate Powerhouse Tailwater Depression System.	E2-27
2.2-2.	General arrangement for YCWA’s proposed New Colgate Powerhouse Tailwater Depression System.	E2-28
2.2-3.	Piping sections and details for YCWA’s proposed New Colgate Powerhouse Tailwater Depression System.	E2-29

List of Figures (continued)
Description

Figure No.	Description	Page No.
2.2-4.	Conceptual level plan and profile for YCWA’s proposed New Bullards Bar Dam Flood Control Outlet.	E2-34
2.2-5.	Construction area for YCWA’s proposed New Bullards Bar Flood Control Outlet.	E2-39
3.1-1.	Streambed gradient of the Yuba River from the most upstream Project facility on each tributary to the Yuba River confluence with the Feather River.	E3-7
3.1-2.	Yuba River sub-basins.	E3-9
3.1-3.	General location of dams within the Yuba River watershed.	E3-21
3.3.1-1.	Generalized geologic map of the Project Vicinity. Project Vicinity was defined for the purposes of area computations as an area roughly 3 miles beyond the existing FERC Project Boundary.	E3.3.1-3
3.3.1-2.	Active and inactive mines in the Project Vicinity. Project Vicinity was defined for the purposes of area computations as an area roughly 3 miles beyond the existing FERC Project Boundary.	E3.3.1-6
3.3.1-3.	Soil associations within 3 miles of the Project Area.	E3.3.1-12
3.3.1-4.	Study area and sites for YCWA’s Study 1.1, <i>Channel Morphology Upstream of Englebright Reservoir</i>	E3.3.1-25
3.3.2-1.	Schematic of the Project Vicinity, including USGS gage identification numbers.	E3.3.2-6
3.3.2-2.	Water temperature profiles in New Bullards Bar Reservoir near the dam in 2011.	E3.3.2-28
3.3.2-3.	Water temperature profiles in Englebright Reservoir near the dam in 2011.	E3.3.2-29
3.3.2-4.	Water temperature profiles in Englebright Reservoir 3.3 mi upstream of the dam in 2011.	E3.3.2-29
3.3.2-5.	New Bullards Bar Reservoir DO concentration profiles at four dates in 2011.	E3.3.2-31
3.3.2-6.	New Bullards Bar Reservoir water temperature profiles at four dates in 2011.	E3.3.2-32
3.3.2-7.	Englebright Reservoir DO concentration profiles at four dates in 2011.	E3.3.2-34
3.3.2-8.	Englebright Reservoir temperature profiles at four dates in 2011.	E3.3.2-34
3.3.2-9.	Daily maximum water temperatures in the Middle Yuba River downstream of Our House Diversion Dam (Site M01, loggers A – D; flow—USGS 11408880).	E3.3.2-44
3.3.2-10.	Daily maximum water temperatures in the Middle Yuba River upstream of the confluence with Oregon Creek (Site M02, loggers A – D; flow—USGS 11408880).	E3.3.2-45

List of Figures (continued)

Figure No.	Description	Page No.
3.3.2-11.	Daily maximum water temperatures in the Middle Yuba River downstream of the confluence with Oregon Creek (Site M03, loggers A – D; flow—USGS 11408880 + USGS 11409400).	E3.3.2-45
3.3.2-12.	Daily maximum water temperatures in Oregon Creek near Celestial Valley (Site M04, loggers A – D; USGS 11409400).....	E3.3.2-46
3.3.2-13.	Simulated daily water temperatures for a representative wet WY (1998) at various locations along the Middle Yuba River.	E3.3.2-50
3.3.2-14.	Simulated daily water temperatures for a representative dry WY (2001) at various locations along the Middle Yuba River.	E3.3.2-50
3.3.2-15.	Simulated daily water temperatures for a normal WY (2005) at various locations along the Middle Yuba River.	E3.3.2-51
3.3.2-16.	Simulated daily water temperatures for a representative wet WY (1998) at various locations along Oregon Creek.	E3.3.2-52
3.3.2-17.	Simulated daily water temperatures for a representative dry WY (2001) at various locations along Oregon Creek.	E3.3.2-52
3.3.2-18.	Simulated daily water temperatures for a representative normal WY (2005) at various locations along Oregon Creek.....	E3.3.2-53
3.3.2-19.	Simulated daily water temperatures for a representative wet WY (1998) at various locations along the North Yuba River.	E3.3.2-54
3.3.2-20.	Simulated daily water temperatures for a representative dry WY (2001) at various locations along the North Yuba River.	E3.3.2-54
3.3.2-21.	Simulated daily water temperatures for a representative normal WY (2005) at various locations along the North Yuba River.	E3.3.2-55
3.3.2-22.	North Yuba River downstream of New Bullards Bar Dam.	E3.3.2-56
3.3.2-23.	Simulated daily water temperatures for a representative wet WY (1998) at various locations along the Yuba River upstream of Englebright Reservoir.	E3.3.2-57
3.3.2-24.	Simulated daily water temperatures for a representative dry WY (2001) at various locations along the Yuba River upstream of Englebright Reservoir.	E3.3.2-57
3.3.2-25.	Simulated daily water temperatures for a representative normal WY (2005) at various locations along the Yuba River upstream of Englebright Reservoir.	E3.3.2-58
3.3.2-26.	Simulated daily water temperatures for a representative wet WY (1998) at various locations along the Yuba River downstream of the Narrows 2 Powerhouse.	E3.3.2-59
3.3.2-27.	Simulated daily water temperatures for a representative dry WY (2001) at various locations along the Yuba River downstream of the Narrows 2 Powerhouse.	E3.3.2-59

List of Figures (continued)
Description

Figure No.	Description	Page No.
3.3.2-28.	Simulated daily water temperatures for a representative normal WY (2005) at various locations along the Yuba River downstream of the Narrows 2 Powerhouse.....	E3.3.2-60
3.3.2-29.	Simulated daily New Bullards Bar Reservoir water surface elevation for the No Action and YCWA’s Proposed Project (Existing) alternatives for representative wet (1998), dry (2001) and normal (2005) WYs.....	E3.3.2-81
3.3.2-30.	Simulated bi-weekly New Bullards Bar Reservoir 10°C and 15°C isotherm elevations for the No Action and YCWA’s Proposed Project (Existing) alternatives for a representative wet (1998) WY. The elevation of the New Colgate Power Tunnel upper and lower intakes is shown.	E3.3.2-82
3.3.2-31.	Simulated bi-weekly New Bullards Bar Reservoir 10°C and 15°C isotherm elevations for the No Action and YCWA’s Proposed Project (Existing) alternatives for a representative dry (2001) WY. The elevation of the New Colgate Power Tunnel upper and lower intakes is shown.	E3.3.2-83
3.3.2-32.	Simulated bi-weekly New Bullards Bar Reservoir 10°C and 15°C isotherm elevations for the No Action and YCWA’s Proposed Project (Existing) alternatives for a representative normal (2005) WY. The elevation of the New Colgate Power Tunnel upper and lower intakes is shown.	E3.3.2-83
3.3.2-33.	Simulated exceedance probability of end-of-September New Bullards Bar Reservoir storage for the No Action and YCWA’s Proposed Project (Existing) alternatives for WYs 1970 through 2010.....	E3.3.2-84
3.3.2-34.	Simulated daily Englebright Reservoir water surface elevation for the No Action and YCWA’s Proposed Project (Existing) alternatives for representative wet (1998), dry (2001) and normal (2005) WYs.....	E3.3.2-85
3.3.2-35.	Simulated bi-weekly Englebright Reservoir 10°C and 15°C isotherm elevations for the No Action and YCWA’s Proposed Project (Existing) alternatives for a representative wet (1998) WY. The elevation of the Narrows 2 Power Tunnel intake is shown.	E3.3.2-86
3.3.2-36.	Simulated bi-weekly Englebright Reservoir 10°C and 15°C isotherm elevations for the No Action and YCWA’s Proposed Project (Existing) alternatives for a representative dry (2001) WY. The elevation of the Narrows 2 Power Tunnel intake is shown.	E3.3.2-86

List of Figures (continued)

Figure No.	Description	Page No.
3.3.2-37.	Simulated bi-weekly Englebright Reservoir 10°C and 15°C isotherm elevations for the No Action and YCWA’s Proposed Project (Existing) alternatives for a representative normal (2005) WY. The elevation of the Narrows 2 Power Tunnel intake is shown.	E3.3.2-87
3.3.2-38.	Simulated daily Narrows 2 Powerhouse release water temperatures for representative wet (1998), dry (2001), and normal (2005) water years.	E3.3.2-88
3.3.2-39.	Exceedance curves of modeled annual irrigation deliveries to YCWA Member Units for the No Action and YCWA’s proposed Project (Existing) alternatives for WYs 1970 through 2010.	E3.3.2-89
3.3.2-40.	Simulated daily water temperatures for a representative wet WY (1998) at various locations along the Middle Yuba River.	E3.3.2-95
3.3.2-41.	Simulated daily water temperatures for a representative dry WY (2001) at various locations along the Middle Yuba River.	E3.3.2-96
3.3.2-42.	Simulated daily water temperatures for a representative normal WY (2005) at various locations along the Middle Yuba River.	E3.3.2-96
3.3.2-43.	Simulated daily water temperatures for a representative wet WY (1998) at various locations along Oregon Creek.	E3.3.2-97
3.3.2-44.	Simulated daily water temperatures for a representative dry WY (2001) at various locations along Oregon Creek.	E3.3.2-98
3.3.2-45.	Simulated daily water temperatures for a representative normal WY (2005) at various locations along Oregon Creek.	E3.3.2-98
3.3.2-46.	Simulated daily water temperatures for a representative wet WY (1998) at various locations along the North Yuba River.	E3.3.2-99
3.3.2-47.	Simulated daily water temperatures for a representative dry WY (2001) at various locations along the North Yuba River.	E3.3.2-100
3.3.2-48.	Simulated daily water temperatures for a representative dry WY (2005) at various locations along the North Yuba River.	E3.3.2-100
3.3.2-49.	Simulated daily water temperatures for a representative wet WY (1998) at various locations along the Yuba River upstream of Englebright Reservoir.	E3.3.2-101
3.3.2-50.	Simulated daily water temperatures for a representative dry WY (2001) at various locations along the Yuba River upstream of Englebright Reservoir.	E3.3.2-102
3.3.2-51.	Simulated daily water temperatures for a representative normal WY (2005) at various locations along the Yuba River upstream of Englebright Reservoir.	E3.3.2-102

List of Figures (continued)
Description

Figure No.	Description	Page No.
3.3.2-52.	Simulated daily water temperatures for a representative wet WY (1998) at various locations along the Yuba River downstream of the Narrows 2 Powerhouse.	E3.3.2-103
3.3.2-53.	Simulated daily water temperatures for a representative dry WY (2001) at various locations along the Yuba River downstream of the Narrows 2 Powerhouse.	E3.3.2-104
3.3.2-54.	Simulated daily water temperatures for a representative normal WY (2005) at various locations along the Yuba River downstream of the Narrows 2 Powerhouse.	E3.3.2-104
3.3.2-55.	Exceedance curves of modeled mean daily water temperatures in the Middle Yuba River downstream of Our House Dam for the No Action Alternative and Proposed Project Alternative for WYs 1970 through 2010.	E3.3.2-106
3.3.2-56.	Exceedance curves of modeled mean daily water temperatures in the Middle Yuba River upstream of Oregon Creek for the No Action Alternative and Proposed Project Alternative for WYs 1970 through 2010.	E3.3.2-107
3.3.2-57.	Exceedance curves of modeled mean daily water temperatures in the Middle Yuba River downstream of Oregon Creek for the No Action Alternative and Proposed Project Alternative for WYs 1970 through 2010.	E3.3.2-108
3.3.2-58.	Exceedance curves of modeled mean daily water temperatures in the Middle Yuba River upstream of the North Yuba River for the No Action Alternative and Proposed Project Alternative for WYs 1970 through 2010.	E3.3.2-109
3.3.2-59.	Exceedance curves of modeled mean daily water temperatures in Oregon Creek downstream of Log Cabin Diversion Dam for the No Action Alternative and Proposed Project Alternative for WYs 1970 through 2010.	E3.3.2-110
3.3.2-60.	Exceedance curves of modeled mean daily water temperatures in Oregon Creek upstream of the Middle Yuba River for the No Action Alternative and Proposed Project Alternative for WYs 1970 through 2010.	E3.3.2-111
3.3.2-61.	Exceedance curves of modeled mean daily water temperatures in the North Yuba River upstream of the Middle Yuba River for the No Action Alternative and Proposed Project Alternative for WYs 1970 through 2010.	E3.3.2-113
3.3.2-62.	Exceedance curves of modeled mean daily water temperatures in the Yuba River downstream of the Middle Yuba River for the No Action Alternative and Proposed Project Alternative for WYs 1970 through 2010.	E3.3.2-114

List of Figures (continued)

Figure No.	Description	Page No.
3.3.2-63.	Exceedance curves of modeled mean daily water temperatures in the Yuba River upstream of the New Colgate Powerhouse for the No Action Alternative and Proposed Project Alternative for WYs 1970 through 2010.	E3.3.2-115
3.3.2-64.	Exceedance curves of modeled mean daily water temperatures in the Yuba River downstream of the New Colgate Powerhouse for the No Action Alternative and Proposed Project Alternative for WYs 1970 through 2010.	E3.3.2-117
3.3.2-65.	Exceedance curves of modeled mean daily water temperatures in the Yuba River near Smartsville for the No Action Alternative and Proposed Project Alternative for WYs 1970 through 2010.	E3.3.2-118
3.3.2-66.	Exceedance curves of modeled mean daily water temperatures in the Yuba River downstream of Deer Creek for the No Action Alternative and Proposed Project Alternative for WYs 1970 through 2010.	E3.3.2-119
3.3.2-67.	Exceedance curves of modeled mean daily water temperatures in the Yuba River near Parks Bar for the No Action Alternative and Proposed Project Alternative for WYs 1970 through 2010.	E3.3.2-120
3.3.2-68.	Exceedance curves of modeled mean daily water temperatures in the Yuba River downstream of Dry Creek for the No Action Alternative and Proposed Project Alternative for WYs 1970 through 2010.	E3.3.2-121
3.3.2-69.	Exceedance curves of modeled mean daily water temperatures in the Yuba River downstream of Daguerre Point Dam for the No Action Alternative and Proposed Project Alternative for WYs 1970 through 2010.	E3.3.2-123
3.3.2-70.	Exceedance curves of modeled mean daily water temperatures in the Yuba River near Marysville for the No Action Alternative and Proposed Project Alternative for WYs 1970 through 2010.	E3.3.2-124
3.3.2-71.	Exceedance curves of modeled mean daily water temperatures in the Yuba River upstream of the Feather River for the No Action Alternative and Proposed Project Alternative for WYs 1970 through 2010.	E3.3.2-125
3.3.2-72.	Simulated daily water temperatures for a representative wet WY (1998) at various locations along the Yuba River downstream of the Narrows 2 Powerhouse for the No Action Alternative compared to the Future Proposed Project Alternative.	E3.3.2-134
3.3.2-73.	Simulated daily water temperatures for a representative dry WY (2001) at various locations along the Yuba River downstream of the Narrows 2 Powerhouse for the No Action Alternative compared to the Future Proposed Project Alternative.	E3.3.2-134

List of Figures (continued)
Description

Figure No.	Description	Page No.
3.3.2-74.	Simulated daily water temperatures for a representative normal WY (2005) at various locations along the Yuba River downstream of the Narrows 2 Powerhouse for the No Action Alternative compared to the Future Proposed Project Alternative.	E3.3.2-135
3.3.3-1.	Size distribution and direction of migrating hardhead observed using a VAKI Riverwatcher™ fish monitoring system at Daguerre Point Dam fishways (RM 11.6) between January 2004 and February 2012.	E3.3.3-7
3.3.3-2.	Temporal distribution and direction of migrating hardhead observed using a VAKI Riverwatcher™ fish monitoring system at Daguerre Point Dam fishways (RM 11.6) between January 2004 and February 2012.	E3.3.3-8
3.3.3-3.	Study area reaches. Note: the “Feather River Reach” (Feather River downstream of the Yuba River) eventually flows into the Sacramento River.	E3.3.3-21
3.3.3-4.	Non-anadromous species composition collected by RSTs in the Yuba River downstream of Englebright Dam during the 2007-2008 and 2008-2009 RMT surveys. (Asterisk indicates introduced species).	E3.3.3-41
3.3.3-5.	Simpson Lane Reach-specific species relative abundance observed by electrofishing and snorkeling based on the combined study results of Beak (1989) and Kozlowski (2004).	E3.3.3-44
3.3.3-6.	Daguerre Point Dam Reach-specific species relative abundance observed by electrofishing and snorkeling based on the combined study results of Beak (1989) and Kozlowski (2004).	E3.3.3-45
3.3.3-7.	Garcia Gravel Pit Reach-specific species relative abundance observed by electrofishing and snorkeling based on the combined study results of Beak (1989) and Kozlowski (2004).	E3.3.3-46
3.3.3-8.	Narrows Reach-specific species relative abundance observed by electrofishing and snorkeling based on the combined study results of Beak (1989) and Kozlowski (2004).	E3.3.3-47
3.3.3-9.	Temporal distribution of fish species observed during the RST surveys 1999-2009.	E3.3.3-50
3.3.3-10.	Temporal distribution of primary species observed passing Daguerre Point Dam RM 11.6) during the VAKI Riverwatcher™ surveys from 2007 through 2010.	E3.3.3-51
3.3.3-11.	Map of the Feather River in the vicinity of the confluence with the Yuba River.	E3.3.3-54
3.3.3-12.	Summary of detection and rate of diversion at Lohman Ridge Diversion Tunnel.	E3.3.3-60

List of Figures (continued)

Figure No.	Description	Page No.
3.3.3-13.	Summary of detection and rate of diversion at Camptonville Diversion Tunnel.	E3.3.3-61
3.3.3-14.	Looking upstream to the location of the study area in proximity to the Narrows 2 Powerhouse.	E3.3.3-66
3.3.3-15.	Location of Condemned Bar downstream of the New Colgate Powerhouse. Hydraulic transects, bar habitat mapping, fish stranding survey routes and fish stranding observations are shown.	E3.3.3-73
3.3.3-16.	Location of French Bar downstream of New Colgate Powerhouse Reach. Hydraulic transects, bar habitat mapping, fish stranding survey routes and fish stranding observations are shown.	E3.3.3-74
3.3.3-17.	Condemned Bar and French Bar stranding survey counts by event.	E3.3.3-75
3.3.3-18.	General location of the fish carcass observed by YCWA Operations staff on October 23, 2012 in relation to the Narrows 2 Powerhouse and Englebright Dam (yellow dot).	E3.3.3-79
3.3.3-19.	Fifteen-minute flows data at the Full Bypass, Narrows 1 Powerhouse, and Smartsville Gage from 12:00 p.m. on October 22, 2012 to 12:00 p.m. on October 24, 2012. The Narrows 2 Powerhouse and the Partial Bypass did not operate during this period, and spills over Englebright Dam did not occur.	E3.3.3-80
3.3.3-20.	Sean Hoobler of Cal Fish and Wildlife holding an adult Chinook salmon carcass found in the crevice he is kneeling in on October 25, 2012. Photo taken by John Wooster of NMFS.	E3.3.3-81
3.3.3-21.	Fifteen-minute discharge data at the Partial Bypass, Full Bypass, Narrows 1 Powerhouse, and Smartsville Gage from 12:00 p.m. on October 24, 2012 to 12:00 p.m. on October 26, 2012. The Narrows 2 Powerhouse did not operate during this period, and spills over Englebright Dam did not occur. The time the fish carcass was observed is shown.	E3.3.3-82
3.3.3-22.	Series of photos cataloging the location and position of the fish carcass found on October 7, 2013.	E3.3.3-84
3.3.3-23.	Fifteen-minute discharge data at the Partial Bypass, Full Bypass, Narrows 1 Powerhouse, and Smartsville Gage from 2:00 p.m. October 6, 2013 to 2:00 p.m. October 8, 2013. The Narrows 2 Powerhouse did not operate during this period, and spills over Englebright Dam did not occur.	E3.3.3-86
3.3.3-24.	Series of photos that show the pool in which the fish were observed on October 11, 2013. The photos were taken from the Narrows 2 Powerhouse deck looking south across the Yuba River.	E3.3.3-87

List of Figures (continued)
Description

Figure No.	Description	Page No.
3.3.3-25.	Fifteen-minute discharge data at the Narrows 2 Powerhouse, Full Bypass, Narrows 1 Powerhouse, and Smartsville Gage from 12:00 p.m. October 10, 2013 to 12:00 p.m. October 14, 2013. The Partial Bypass did not operate during this period, and Englebright Dam did not spill. The time the fish were observed in the pool is shown.	E3.3.3-89
3.3.3-26.	Daguerre Point Dam and associated north and south fish ladders. The South Yuba-Brophy District is seen in the upper left corner of the photograph.	E3.3.3-92
3.3.3-27.	The Daguerre Point Dam north (on left) and south (on right) fish ladders.	E3.3.3-92
3.3.3-28.	Hallwood-Cordua Diversion. Image on the left shows the control gate headworks on the north abutment of Daguerre Point Dam. Image on the right shows the current v-shaped screen.	E3.3.3-96
3.3.3-29.	The South Yuba-Brophy Diversion. The image on the left shows the general location of the diversion (center of picture) relative to Daguerre Point Dam. The image on the right shows an aerial view of the bypass channel, rock gabion, and diversion pool.	E3.3.3-97
3.3.3-30.	Browns Valley Diversion. Image shows the screen and diversion forebay.	E3.3.3-98
3.3.3-31.	WUA for rainbow trout in the Our House Diversion Dam Reach of the Middle Yuba River.....	E3.3.3-101
3.3.3-32.	WUA for Sacramento sucker in the Our House Diversion Dam Reach of the Middle Yuba River.	E3.3.3-102
3.3.3-33.	WUA for rainbow trout in the Oregon Creek Reach of the Middle Yuba River.	E3.3.3-103
3.3.3-34.	WUA for Sacramento sucker in the Oregon Creek Reach of the Middle Yuba River.	E3.3.3-104
3.3.3-35.	WUA for rainbow trout in the Log Cabin Diversion Dam sub-reach of Oregon Creek.....	E3.3.3-105
3.3.3-36.	WUA for Sacramento sucker in the Log Cabin Diversion Dam sub-reach of Oregon Creek.	E3.3.3-106
3.3.3-37.	WUA for rainbow trout in the Celestial Valley sub-reach of Oregon Creek.	E3.3.3-107
3.3.3-38.	WUA for Sacramento sucker in the Celestial Valley sub-reach of Oregon Creek.	E3.3.3-108
3.3.3-39.	WUA for rainbow trout in the New Bullards Bar Dam Reach of the North Yuba River.....	E3.3.3-109
3.3.3-40.	WUA for Sacramento sucker in the New Bullards Bar Dam Reach of the North Yuba River.	E3.3.3-110

List of Figures (continued)

Figure No.	Description	Page No.
3.3.3-41.	WUA for hardhead and pikeminnow in the New Bullards Bar Dam Reach of the North Yuba River.	E3.3.3-111
3.3.3-42.	WUA for rainbow trout in the Middle/North Yuba River Reach of the Yuba River.	E3.3.3-112
3.3.3-43.	WUA for Sacramento sucker in the Middle/North Yuba River Reach of the Yuba River.	E3.3.3-113
3.3.3-44.	WUA for hardhead and pikeminnow in the Middle/North Yuba River Reach of the Yuba River.	E3.3.3-114
3.3.3-45.	WUA for rainbow trout in the New Colgate Powerhouse Reach of the Yuba River.	E3.3.3-115
3.3.3-46.	WUA for Sacramento sucker in the New Colgate Powerhouse Reach of the Yuba River.	E3.3.3-116
3.3.3-47.	WUA for hardhead and pikeminnow in the New Colgate Powerhouse Reach of the Yuba River.	E3.3.3-117
3.3.3-48.	Map of hydrologic node locations for the habitat duration analysis (HDA).	E3.3.3-123
3.3.3-49.	Habitat duration analysis results for the Our House Diversion Dam Reach, Middle Yuba River for the No Action Alternative at Node 0.	E3.3.3-125
3.3.3-50.	Habitat duration analysis results for the Our House Diversion Dam Reach, Middle Yuba River for the No Action Alternative at Node 1.	E3.3.3-126
3.3.3-51.	Habitat duration analysis results for the Oregon Creek Reach, Middle Yuba River for the No Action Alternative at Node 2.	E3.3.3-127
3.3.3-52.	Habitat duration analysis results for the Log Cabin Diversion Dam Reach, Oregon Creek for the No Action Alternative at Node 0.	E3.3.3-128
3.3.3-53.	Habitat duration analysis results for Log Cabin Diversion Dam Reach, Oregon Creek for the No Action Alternative at Node 1.	E3.3.3-129
3.3.3-54.	Habitat duration results for the Log Cabin Diversion Dam Reach, Oregon Creek for the No Action Alternative at Node 2 (Celestial Valley).	E3.3.3-130
3.3.3-55.	Habitat duration results for Log Cabin Diversion Dam Reach, Oregon Creek for the No Action Alternative at Node 3.	E3.3.3-131
3.3.3-56.	Habitat duration results for the New Bullards Bar Dam Reach, North Yuba River for the No Action Alternative at Node 0.	E3.3.3-132
3.3.3-57.	Habitat duration results for the New Bullards Bar Dam Reach, North Yuba River for the No Action Alternative at Node 1.	E3.3.3-133
3.3.3-58.	Habitat duration results for the Middle/North Yuba River Reach, Yuba River for the No Action Alternative at Node 1.	E3.3.3-134

List of Figures (continued)

Figure No.	Description	Page No.
3.3.3-59.	Habitat duration results for the New Colgate Powerhouse Reach, Yuba River for the No Action Alternative at Node 0.	E3.3.3-135
3.3.3-60.	Habitat duration results for the New Colgate Powerhouse Reach, Yuba River for the No Action Alternative at Node 1.	E3.3.3-136
3.3.3-61.	Map of hydrologic zone boundaries used in Study 7.10.....	E3.3.3-138
3.3.3-62.	Englebright Dam Hydrologic Zone Chinook salmon WUA results.	E3.3.3-142
3.3.3-63.	Englebright Dam Hydrologic Zone steelhead WUA results.....	E3.3.3-143
3.3.3-64.	Englebright Dam Hydrologic Zone rainbow trout adult, and lamprey guild WUA results.	E3.3.3-144
3.3.3-65.	Deer Creek Hydrologic Zone Chinook salmon WUA results.	E3.3.3-145
3.3.3-66.	Deer Creek Hydrologic Zone steelhead WUA results.....	E3.3.3-146
3.3.3-67.	Deer Creek Hydrologic Zone rainbow trout adult and lamprey adult WUA results.....	E3.3.3-147
3.3.3-68.	Dry Creek Hydrologic Zone Chinook salmon WUA results.....	E3.3.3-148
3.3.3-69.	Dry Creek Hydrologic Zone steelhead WUA results.	E3.3.3-149
3.3.3-70.	Dry Creek Hydrologic Zone rainbow trout adult and lamprey adult WUA results.....	E3.3.3-150
3.3.3-71.	Daguerre Point Dam Hydrologic Zone Chinook salmon WUA results.	E3.3.3-151
3.3.3-72.	Daguerre Point Dam Hydrologic Zone steelhead WUA results.	E3.3.3-152
3.3.3-73.	Daguerre Point Dam Hydrologic Zone rainbow trout adult, lamprey adult, and lamprey ammocoete WUA results.	E3.3.3-153
3.3.3-74.	Relationship between flows at the Marysville Gage and North American green sturgeon spawning WUA (in pool morphological units) in the Yuba River downstream of Daguerre Point Dam.....	E3.3.3-157
3.3.3-75.	Relationship between flows at the Marysville Gage and green sturgeon spawning WUA (in all morphological units) in the Yuba River downstream of Daguerre Point Dam.....	E3.3.3-158
3.3.3-76.	Foothill yellow-legged frog survey site locations.....	E3.3.3-163
3.3.3-77.	Egg mass combined suitability output from the Middle Yuba 2D model for three simulation flows.	E3.3.3-171
3.3.3-78.	Tadpole combined suitability output from the Middle Yuba 2D model for three simulation flows.	E3.3.3-172
3.3.3-79.	Egg mass combined suitability output from the Oregon Creek 2D model for three simulation flows.	E3.3.3-175
3.3.3-80.	Tadpole combined suitability output from the Oregon Creek 2D model for three simulation flows.	E3.3.3-176
3.3.3-81.	WUA for FYLF egg mass and tadpole life stages in the Oregon Creek and Middle Yuba River study sites.	E3.3.3-177

List of Figures (continued)
Description

Figure No.	Description	Page No.
3.3.3-82.	Locations of WPT field reconnaissance and survey detections, incidental observations, and existing records.	E3.3.3-181
3.3.3-83.	Overview of scores by basin, stream, and indices. Sites with starred symbols represent locations where insufficient organisms were collected to make the resultant IBI and MMI scores reliable.	E3.3.3-189
3.3.3-84.	Example HDA “Area Under the Curve” bar chart showing YCWA’s proposed Project minimum streamflow to the No Action Alternative (i.e., Base Case) by month for rainbow trout adult for the 41 period of record.	E3.3.3-206
3.3.3-85.	Example HDA “Area Under the Curve” bar chart showing the Proposed Project and No Action Alternatives (i.e., Base Case) by month for rainbow trout spawning for the 41 period of record.	E3.3.3-207
3.3.3-86.	Example HDA “Area Under the Curve” bar chart showing the Proposed Project and No Action Alternative (i.e., Base Case) by species for August in all water years for the 41 period of record.	E3.3.3-208
3.3.3-87.	AUC for all life stages and species at Node 0 on the Middle Yuba River based on YCWA’s proposed Project and the No Action Alternative.....	E3.3.3-212
3.3.3-88.	AUC for all life stages and species at Node 1 on the Middle Yuba River based on YCWA’s proposed Project and the No Action Alternative.....	E3.3.3-213
3.3.3-89.	AUC for all life stages and species at Node 0 on Oregon Creek based on YCWA’s Proposed Project and the No Action Alternative.....	E3.3.3-220
3.3.3-90.	AUC for all life stages and species at Node 1 on Oregon Creek based on YCWA’s Proposed Project and the No Action Alternative.....	E3.3.3-220
3.3.3-91.	AUC for all life stages and species at Node 2 on Oregon Creek based on YCWA’s Proposed Project and the No Action Alternative.....	E3.3.3-221
3.3.3-92.	AUC for all life stages and species at Node 3 on Oregon Creek based on YCWA’s Proposed Project and the No Action Alternative.....	E3.3.3-221
3.3.3-93.	AUC for all life stages and species at Node 2 in the Oregon Creek Reach based on YCWA’s Proposed Project and the No Action Alternative.....	E3.3.3-226
3.3.3-94.	AUC for all life stages and species at Node 0 in the NBB Dam Reach based on YCWA’s Proposed Project and the No Action Alternative.....	E3.3.3-230

List of Figures (continued)

Figure No.	Description	Page No.
3.3.3-95.	AUC for all life stages and species at Node 1 in the NBB Dam Reach based on YCWA’s Proposed Project and the No Action Alternative.....	E3.3.3-230
3.3.3-96.	AUC for all life stages and species at Node 1 in the NYR/MYR Reach based on YCWA’s Proposed Project and the No Action Alternative.....	E3.3.3-233
3.3.3-97.	AUC for all life stages and species at Node 0 on the Yuba River based on YCWA’s Proposed Project and the No Action Alternative.....	E3.3.3-236
3.3.3-98.	AUC for all life stages and species at Node 1 in the Yuba River based on YCWA’s Proposed Project and the No Action Alternative.....	E3.3.3-237
3.3.3-99.	Modeled flows in the Middle Yuba River below Our House Diversion Dam for YCWA’s No Action Alternative and proposed Project, which includes Condition AR2, Spill Cessation.	E3.3.3-240
3.3.6-1.	Functional use periods for the Cottage Creek and Dark Day boat ramps by median WSE and WY type based on Water Balance/Operations Model run results for WYs 1970 through WY 2010.....	E3.3.6-26
3.3.6-2.	Photograph of the slope instability site upslope from the Dark Day boat ramp at low water levels (typically during the non-peak season).....	E3.3.6-27
3.3.7-1.	Fire ignitions within the Project Vicinity.....	E3.3.7-18
3.3.8-1.	Cultural Resources, Project Effects and Management Measures.	E3.3.8-21

List of Tables

Table No.	Description	Page No.
1.3-1.	Summary of statutory and regulatory requirements and status.....	E1-9
1.3-2.	Designated beneficial uses of surface water within the Project and the area downstream by HU in the Basin Plan.	E1-20
1.4-1.	List of comment letters in chronological order filed with FERC on FERC’s Scoping Document 1 and YCWA’s Pre-Application Document.....	E1-32
1.4-2.	Studies proposed by YCWA in its Revised Study Plan and subsequently modified, including new studies added by FERC.....	E1-35
1.4-3.	Comment letters filed with FERC regarding YCWA’s Yuba River Development Project’s Initial Study Report and meeting summary.	E1-39

List of Tables (continued)

Table No.	Description	Page No.
1.4-4.	Comment letters filed with FERC regarding YCWA’s Yuba River Development Project’s Updated Study Report and meeting summary.....	E1-40
1.4-5.	Status of studies as of filing of the License Application.	E1-41
1.4-6.	Comment letters filed with FERC regarding YCWA’s Yuba River Development Project’s Draft License Application.	E1-44
2.1-1.	Key information regarding Yuba River Development Project powerhouses.....	E2-1
2.1-2.	Key information regarding Yuba River Development Project reservoirs and impoundments.	E2-2
2.1-3.	Typical distribution of flows under normal operations (i.e., excluding brief transition periods) among Narrows 2 Powerhouse (generation only), Partial Bypass, Full Bypass and Narrows 1 Powerhouse.	E2-16
2.1-4.	New Bullards Bar Reservoir flood storage space allocation in thousands of acre-feet.	E2-19
2.1-5.	Yuba Accord flow schedules.	E2-20
2.1-6.	Water right licenses held by YCWA for operation of the Project for power generation.	E2-22
2.1-7.	YCWA’s annual contract amounts and place of delivery.....	E2-23
2.1-8.	YCWA’s water supply contract shortage provisions.....	E2-25
2.2-1.	Primary Project Roads and Trails (non-recreation roads and trails) included in Yuba River Development Project.	E2-45
2.2-2.	Recreation roads included in Yuba River Development Project.	E2-46
2.2-3.	Proposed additions to Primary Project Roads and Trails (non-recreation roads and trails) included in Yuba River Development Project by Development.....	E2-47
2.2-4.	Proposed additions to and withdrawals of Recreation Roads associated with the New Colgate Development. YCWA does not propose any changes to Recreation Roads and Trails associated with the New Bullards Bar Minimum Flow Development or the Narrows 2 Development.	E2-48
2.2-5.	Summary of land ownership within the proposed Yuba River Development Project FERC Project Boundary by Project Development and difference as compared to existing FERC Project Boundary.....	E2-52
2.2-6.	Measures included in YCWA’s Proposed Yuba River Development Project.....	E2-52
3.1-1.	Stream reaches in the Yuba River Basin potentially affected by continued Project operations.....	E3-16

List of Tables (continued)

Table No.	Description	Page No.
3.1-2.	Streams and tributaries to the North, Middle, South, and main stem of the Yuba River.....	E3-17
3.1-3.	Owners and capacities of dams and diversions in the Yuba River Basin.	E3-18
3.3.1-1.	Mines in the Yuba River Development Project Vicinity.	E3.3.1-7
3.3.1-2.	Soil series and order summary description in the Project Vicinity.....	E3.3.1-8
3.3.1-3.	Soil associations in the Project Vicinity.	E3.3.1-10
3.3.1-4.	Estimated volume of sediment removed from Our House Diversion Dam impoundment from 1986 to the present.	E3.3.1-14
3.3.1-5.	Estimates of sediment yield at sediment supply nodes based on regional estimate of yield and drainage area under the With-Project and Without-Project conditions.	E3.3.1-16
3.3.1-6.	Summary of channel storage of coarse sediment in Middle Yuba River and Oregon Creek downstream of Project diversion dams.....	E3.3.1-18
3.3.1-7.	Location of reaches where channel morphology study sites were located, and transects selected for channel morphology evaluation from among Study 3.10, <i>Instream Flow Upstream of Englebright Reservoir</i> , transects.	E3.3.1-23
3.3.2-1.	Streamflow gages and Project tunnel, powerhouse and reservoir gages.	E3.3.2-4
3.3.2-2.	No Action Alternative flows and storage by month from YCWA’s With-Project Hydrology dataset.	E3.3.2-9
3.3.2-3.	North Yuba River sub-basin diversions by SFWPA’s South Feather Power Project – Slate Creek Diversion Dam diversions for representative WY types.....	E3.3.2-13
3.3.2-4.	Middle Yuba River sub-basin diversions by NID’s Yuba-Bear Hydroelectric Project – Milton Diversion Dam diversions for representative WY types.....	E3.3.2-14
3.3.2-5.	South Yuba River sub-basin diversions by NID’s Yuba-Bear Hydroelectric Project – Bowman-Spaulding Diversion Conduit diversions for representative WY types.....	E3.3.2-14
3.3.2-6.	South Yuba River sub-basin diversions by PG&E’s Drum-Spaulding Project – Spaulding Dam diversions for representative WY types.	E3.3.2-14
3.3.2-7.	Water quality objectives to support beneficial uses in the vicinity of the Project as designated by the CVRWQCB and listed in the Basin Plan.	E3.3.2-16
3.3.2-8.	Water quality standards, criteria and benchmark values used for evaluating the protection of designated beneficial uses ¹ in the vicinity of the Yuba River Development Project.....	E3.3.2-17

List of Tables (continued)

Table No.	Description	Page No.
3.3.2-9.	Temperature and DO concentrations found in YCWA’s routine reservoir profile locations by reservoir.	E3.3.2-27
3.3.2-10.	Monthly minimum, average and maximum DO concentrations in New Bullards Bar Reservoir near the dam from November 2010 through August 2012.....	E3.3.2-30
3.3.2-11.	Monthly minimum, average and maximum DO concentrations in Englebright Reservoir near the dam from November 2010 through August 2012.....	E3.3.2-32
3.3.2-12.	Monthly minimum, average and maximum DO concentrations in Englebright Reservoir 3.3 mi upstream of the dam from April 2011 through August 2012.....	E3.3.2-33
3.3.2-13.	Continuous stream water temperature monitoring location information.....	E3.3.2-35
3.3.2-14.	WYs 2009 through 2012 minimum and maximum daily average stream temperatures (°C) by month. Shaded cells indicate values over 20°C. An * indicates a site above the Project (i.e., not affected by the Project).	E3.3.2-39
3.3.2-15.	Margin water temperature station information.	E3.3.2-43
3.3.2-16.	Range of mercury concentrations in fish tissue by location and species.	E3.3.2-62
3.3.2-17.	YCWA’s proposed Project flows and storage from YCWA’s Proposed Project (Existing) Hydrology dataset.....	E3.3.2-66
3.3.2-18.	Comparison between the Existing FERC License, Smartsville Index and North Yuba Index for WYs 1970 through 2010 for the Proposed Project and No Action Alternative.....	E3.3.2-71
3.3.2-19.	Changes in Project flows and storage from No Action Alternative to YCWA’s Proposed Project (Existing) Alternative.....	E3.3.2-73
3.3.2-20.	Proposed recreation-related rehabilitation and enhancements with the potential to effect water quality.	E3.3.2-90
3.3.2-21.	Average usable storage in New Bullards Bar Reservoir at the 10°C and 15°C isotherms for the modeled period of record (WYs 1970 through 2010) based on Operations Model and HEC-5Q temperature model results.....	E3.3.2-92
3.3.2-22.	Comparison of simulated mean monthly water temperatures in the Middle Yuba River downstream of Our House Dam for the No Action Alternative and Proposed Project Alternative for WYs 1970 through 2010.	E3.3.2-106

List of Tables (continued)
Description

Table No.	Description	Page No.
3.3.2-23.	Comparison of simulated mean monthly water temperatures in the Middle Yuba River upstream of Oregon Creek for the No Action Alternative and Proposed Project Alternative for WYs 1970 through 2010.	E3.3.2-107
3.3.2-24.	Comparison of simulated mean monthly water temperatures in the Middle Yuba River downstream of Oregon Creek for the No Action Alternative and Proposed Project Alternative for WYs 1970 through 2010.	E3.3.2-108
3.3.2-25.	Comparison of simulated mean monthly water temperatures in the Middle Yuba River upstream of the North Yuba River for the No Action Alternative and Proposed Project Alternative for WYs 1970 through 2010.	E3.3.2-109
3.3.2-26.	Comparison of simulated mean monthly water temperatures in Oregon Creek downstream of Log Cabin Diversion Dam for the No Action Alternative and Proposed Project Alternative for WYs 1970 through 2010.	E3.3.2-111
3.3.2-27.	Comparison of simulated mean monthly water temperatures in Oregon Creek upstream of the Middle Yuba River for the No Action Alternative and Proposed Project Alternative for WYs 1970 through 2010.	E3.3.2-112
3.3.2-28.	Comparison of simulated mean monthly water temperatures in the North Yuba River upstream of the Middle Yuba River for the No Action Alternative and Proposed Project Alternative for WYs 1970 through 2010.	E3.3.2-113
3.3.2-29.	Comparison of simulated mean monthly water temperatures in the Yuba River downstream of the Middle Yuba River for the No Action Alternative and Proposed Project Alternative for WYs 1970 through 2010.	E3.3.2-115
3.3.2-30.	Comparison of simulated mean monthly water temperatures in the Yuba River upstream of the New Colgate Powerhouse for the No Action Alternative and Proposed Project Alternative for WYs 1970 through 2010.	E3.3.2-116
3.3.2-31.	Comparison of simulated mean monthly water temperatures in the Yuba River downstream of the New Colgate Powerhouse for the No Action Alternative and Proposed Project Alternative for WYs 1970 through 2010.	E3.3.2-117
3.3.2-32.	Comparison of simulated mean monthly water temperatures in the Yuba River near Smartsville for the No Action Alternative and Proposed Project Alternative for WYs 1970 through 2010.	E3.3.2-118

List of Tables (continued)

Table No.	Description	Page No.
3.3.2-33.	Comparison of simulated mean monthly water temperatures in the Yuba River downstream of Deer Creek for the No Action Alternative and Proposed Project Alternative for WYs 1970 through 2010.	E3.3.2-120
3.3.2-34.	Comparison of simulated mean monthly water temperatures in the Yuba River near Parks Bar for the No Action Alternative and Proposed Project Alternative for WYs 1970 through 2010.	E3.3.2-120
3.3.2-35.	Comparison of simulated mean monthly water temperatures in the Yuba River downstream of Dry Creek for the No Action Alternative and Proposed Project Alternative for WYs 1970 through 2010.	E3.3.2-121
3.3.2-36.	Comparison of simulated mean monthly water temperatures in the Yuba River downstream of Daguerre Point Dam for the No Action Alternative and Proposed Project Alternative for WYs 1970 through 2010.	E3.3.2-123
3.3.2-37.	Comparison of simulated mean monthly water temperatures in the Yuba River near Marysville for the No Action Alternative and Proposed Project Alternative for WYs 1970 through 2010.	E3.3.2-124
3.3.2-38.	Comparison of simulated mean monthly water temperatures in the Yuba River upstream of the Feather River for the No Action Alternative and Proposed Project Alternative for WYs 1970 through 2010.	E3.3.2-125
3.3.2-39.	The total available water supply, as calculated by the North Yuba Index, and the total minimum required flow below Narrows 2 Powerhouse, by Yuba Accord Water Year Type.	E3.3.2-139
3.3.3-1.	List of fish species that have been reported to occur in the Yuba River watershed within the Project Area.	E3.3.3-3
3.3.3-2.	Life stage-specific periodicities for fall-run Chinook salmon in the Yuba River (shaded boxes indicate temporal utilization of the Yuba River).	E3.3.3-9
3.3.3-3.	Summary of pink salmon observed migrating past Daguerre Point Dam (RM 13.6) in the Yuba River during the VAKI Riverwatcher™ monitoring study from 2004 through 2012.	E3.3.3-11
3.3.3-4.	Known stocked fish species in New Bullards Bar Reservoir from 1969 through 2011.	E3.3.3-16
3.3.3-5.	Summary of relative abundance, length, and weight of all fish species collected at New Bullards Bar Reservoir in January and June 2012 in order of abundance.	E3.3.3-17
3.3.3-6.	Known stocked fish species in Englebright Reservoir from 1965 through 2012.	E3.3.3-18

List of Tables (continued)

Table No.	Description	Page No.
3.3.3-7.	Summary of relative abundance, length, and weight of all fish species collected at Englebright Reservoir in June 2012 in order of abundance.	E3.3.3-18
3.3.3-8.	Overview of fish species present from YCWA’s Study 3.8 conducted in 2012 and 2013, as well as documented species presence from historical reports.....	E3.3.3-23
3.3.3-9.	Summary of 2012 and 2013 fish population information collected by quantitative electrofishing for the Middle Yuba River upstream of Our House Diversion Dam (RM 13.3).	E3.3.3-24
3.3.3-10.	Summary of 2012 and 2013 fish population information collected by quantitative electrofishing for the Oregon Creek upstream of Log Cabin Diversion Dam Site (RM 4.5).....	E3.3.3-26
3.3.3-11.	Summary of 2012 and 2013 fish population information from quantitative snorkeling observations for the Middle Yuba River Downstream of Our House Diversion Dam Site (RM 12.5).....	E3.3.3-28
3.3.3-12.	Summary of 2012 and 2013 fish population information collected by quantitative electrofishing for the Middle Yuba River site at RM 5.0.	E3.3.3-29
3.3.3-13.	Summary results of 2012 and 2013 fish population information collected by quantitative electrofishing for the Oregon Creek downstream of Log Cabin Diversion Dam Site (RM 0.3).....	E3.3.3-30
3.3.3-14.	Summary of 2012 and 2013 fish population information from quantitative snorkeling observations for the Middle Yuba River downstream of Moonshine Creek Site (RM 3.3).....	E3.3.3-31
3.3.3-15.	Summary of 2012 and 2013 fish population information from quantitative snorkeling observations for the Middle Yuba River Downstream of Yellowjacket Creek Site (RM 1.0).....	E3.3.3-32
3.3.3-16.	Summary of 2012 and 2013 fish population information collected by quantitative electrofishing for the Middle Yuba River Downstream of Yellowjacket Creek Site (RM 1.0).....	E3.3.3-32
3.3.3-17.	Summary of 2012 and 2013 fish population information from quantitative snorkeling observations for the North Yuba River Upstream of Middle Yuba River Site (RM 0.2).	E3.3.3-33
3.3.3-18.	Summary of 2012 and 2013 fish population information from quantitative snorkeling observations for the Yuba River Downstream of Middle Yuba River Site (RM 39.6).....	E3.3.3-34
3.3.3-19.	Summary of 2012 and 2013 fish population information from quantitative snorkeling observations for the Yuba River Upstream of New Colgate Powerhouse Site (RM 35.0).....	E3.3.3-35

List of Tables (continued)

Table No.	Description	Page No.
3.3.3-20.	Summary of 2012 and 2013 fish population information from quantitative snorkeling observations for the Yuba River Downstream of New Colgate Powerhouse Site (RM 33.7)1	E3.3.3-36
3.3.3-21.	Fish species distribution in the Yuba River downstream of Englebright Dam.....	E3.3.3-37
3.3.3-22.	Native fish species and associated assemblages of the Yuba River watershed downstream of Englebright Dam.....	E3.3.3-39
3.3.3-23.	Fish species composition related to fish assemblages in the Yuba River downstream of Englebright Dam.	E3.3.3-42
3.3.3-24.	Relative abundance in descending order for fish collected from 1999 through 2009 by RST surveys in the Yuba River near Hallwood Boulevard (RM 7.2).	E3.3.3-48
3.3.3-25.	Relative abundance in descending order for fish observed by VAKI Riverwatcher™ passing through the fishways at Daguerre Point Dam on the Yuba River (RM 11.6) from 2008 through 2010.....	E3.3.3-49
3.3.3-26.	Effort, number tagged, and total catch by 0.1 mi interval zone on the Middle Yuba River, upstream of Our House Diversion Dam.....	E3.3.3-56
3.3.3-27.	Effort, number of tagged fish (rainbow trout), and total fish catch by zone on Oregon Creek.	E3.3.3-57
3.3.3-28.	Date, duration, and discharge when antennas at Lohman Ridge Diversion Tunnel and Camptonville Diversion Tunnel were out of service.	E3.3.3-58
3.3.3-29.	Detections, number of fish, and origin of fish detected at Lohman Ridge and Camptonville diversion tunnels.....	E3.3.3-59
3.3.3-30.	Summary of fish that generated multiple detections with no more than a 24-hour period between detections.	E3.3.3-61
3.3.3-31.	Summary of fish that moved up the Lohman Ridge Tunnel.....	E3.3.3-62
3.3.3-32.	Estimated entrainment of rainbow trout into the Lohman Ridge and Camptonville diversion tunnels based on 2012/2013 Entrainment Study.	E3.3.3-63
3.3.3-33.	Summary of catch by gillnet depth at Site 1 near New Bullards Bar Dam in January and June 2012.....	E3.3.3-64
3.3.3-34.	Summary of catch by gillnet depth at Site 1 near Englebright Dam from June 22-24, 2012.....	E3.3.3-65
3.3.3-35.	Summary of planned and actual operational events from July through November 2013.	E3.3.3-68
3.3.3-36.	WUA table for rainbow trout in the Our House Diversion Dam Reach.....	E3.3.3-101

List of Tables (continued)
Description

Table No.	Description	Page No.
3.3.3-37.	Values with conditional formatting from 80 to 100 percent of the maximum WUA. Bimodal curves have the lower peak highlighted in yellow, and the upper peak highlighted in green for the Our House Diversion Dam Reach.....	E3.3.3-101
3.3.3-38.	WUA table for Sacramento sucker in the Our House Diversion Dam Reach.....	E3.3.3-102
3.3.3-39.	Values with conditional formatting from 80 to 100 percent of the maximum WUA. Bimodal curves have the lower peak highlighted in yellow, and the upper peak highlighted in green for the Our House Diversion Dam Reach.....	E3.3.3-102
3.3.3-40.	WUA table for rainbow trout in the Oregon Creek Reach of the Middle Yuba River.	E3.3.3-103
3.3.3-41.	Values with conditional formatting from 80 to 100 percent of the maximum WUA. Bimodal curves have the lower peak highlighted in yellow, and the upper peak highlighted in green for the Oregon Creek Reach of the Middle Yuba River.....	E3.3.3-103
3.3.3-42.	WUA table for Sacramento sucker in the Oregon Creek Reach of the Middle Yuba River.....	E3.3.3-104
3.3.3-43.	Values with conditional formatting from 80 to 100 percent of the maximum WUA. Bimodal curves have the lower peak highlighted in yellow, and the upper peak highlighted in green for the Oregon Creek Reach of the Middle Yuba River.....	E3.3.3-104
3.3.3-44.	WUA table for rainbow trout in the Log Cabin Diversion Dam sub-reach of Oregon Creek.	E3.3.3-105
3.3.3-45.	Values with conditional formatting from 80 to 100 percent of the maximum WUA. Bimodal curves have the lower peak highlighted in yellow, and the upper peak highlighted in green for the Log Cabin Diversion Dam sub-reach of Oregon Creek.	E3.3.3-105
3.3.3-46.	WUA table for Sacramento sucker in the Log Cabin Diversion Dam sub-reach of Oregon Creek.	E3.3.3-106
3.3.3-47.	Values with conditional formatting from 80 to 100 percent of the maximum WUA. Bimodal curves have the lower peak highlighted in yellow, and the upper peak highlighted in green for the Log Cabin Diversion Dam sub-reach of Oregon Creek.....	E3.3.3-106
3.3.3-48.	WUA table for Rainbow trout in the Celestial Valley sub-reach of Oregon Creek	E3.3.3-107
3.3.3-49.	Values with conditional formatting from 80 to 100 percent of the maximum WUA. Bimodal curves have the lower peak highlighted in yellow, and the upper peak highlighted in green for the Celestial Valley sub-reach of Oregon Creek.	E3.3.3-107

List of Tables (continued)

Table No.	Description	Page No.
3.3.3-50.	WUA table for Sacramento sucker in the Celestial Valley sub-reach of Oregon Creek.....	E3.3.3-108
3.3.3-51.	Values with conditional formatting from 80 to 100 percent of the maximum WUA. Bimodal curves have the lower peak highlighted in yellow, and the upper peak highlighted in green for the Celestial Valley sub-reach of Oregon Creek.	E3.3.3-108
3.3.3-52.	WUA table for rainbow trout in the New Bullards Bar Dam Reach.	E3.3.3-109
3.3.3-53.	Values with conditional formatting from 80 to 100 percent of the maximum WUA. Bimodal curves have the lower peak highlighted in yellow, and the upper peak highlighted in green for the New Bullards Bar Dam Reach.	E3.3.3-109
3.3.3-54.	WUA table for Sacramento sucker in the New Bullards Bar Dam Reach.....	E3.3.3-110
3.3.3-55.	Values with conditional formatting from 80 to 100 percent of the maximum WUA. Bimodal curves have the lower peak highlighted in yellow, and the upper peak highlighted in green for the New Bullards Bar Dam Reach.	E3.3.3-110
3.3.3-56.	WUA table for hardhead/pikeminnow in the New Bullards Bar Dam Reach.....	E3.3.3-111
3.3.3-57.	Values with conditional formatting from 80 to 100 percent of the maximum WUA. Bimodal curves have the lower peak highlighted in yellow, and the upper peak highlighted in green for the New Bullards Bar Dam Reach.	E3.3.3-111
3.3.3-58.	WUA table for rainbow trout in the Middle/North Yuba River Reach.....	E3.3.3-112
3.3.3-59.	Values with conditional formatting from 80 to 100 percent of the maximum WUA. Bimodal curves have the lower peak highlighted in yellow, and the upper peak highlighted in green for the Middle/North Yuba River Reach.	E3.3.3-112
3.3.3-60.	WUA table for Sacramento sucker in the Upstream of New Colgate Powerhouse Reach.....	E3.3.3-113
3.3.3-61.	Values with conditional formatting from 80 to 100 percent of the maximum WUA. Bimodal curves have the lower peak highlighted in yellow, and the upper peak highlighted in green for the Upstream of New Colgate Powerhouse Reach.	E3.3.3-113
3.3.3-62.	WUA table for hardhead and pikeminnow in the Middle/North Yuba River Reach.....	E3.3.3-114
3.3.3-63.	Values with conditional formatting from 80 to 100 percent of the maximum WUA. Bimodal curves have the lower peak highlighted in yellow, and the upper peak highlighted in green for the Middle/North Yuba River Reach.....	E3.3.3-114

Description

Table No.	Description	Page No.
3.3.3-79.	Habitat duration results for the Log Cabin Diversion Dam Reach, Oregon Creek for the No Action Alternative at Node 3.	E3.3.3-130
3.3.3-80.	Habitat duration results for the New Bullards Bar Dam Reach, North Yuba River for the No Action Alternative at Node 0.	E3.3.3-131
3.3.3-81.	Habitat duration results for the New Bullards Bar Dam Reach, North Yuba River for the No Action Alternative at Node 1.	E3.3.3-132
3.3.3-82.	Habitat duration results for the Middle/North Yuba River Reach, Yuba River for the No Action Alternative at Node 1.	E3.3.3-133
3.3.3-83.	Habitat duration results for the New Colgate Powerhouse Reach, Yuba River for the No Action Alternative at Node 0.	E3.3.3-134
3.3.3-84.	Habitat duration results for the New Colgate Powerhouse Reach, Yuba River for the No Action Alternative at Node 1.	E3.3.3-135
3.3.3-85.	Hydrologic zone boundaries established for habitat modeling in the Yuba River downstream from Englebright Dam.	E3.3.3-137
3.3.3-86.	Summary table of discharge at peak WUA for Chinook salmon spawning, fry and juvenile life stages.	E3.3.3-141
3.3.3-87.	Summary table of discharge at peak WUA for steelhead spawning, fry, juvenile, and adult life stages.	E3.3.3-141
3.3.3-88.	Summary table of discharge at peak WUA for rainbow trout adult and lamprey ammocoete and adult life stages.	E3.3.3-141
3.3.3-89.	Englebright Dam Hydrologic Zone Chinook salmon WUA results.	E3.3.3-142
3.3.3-90.	Englebright Dam Hydrologic Zone steelhead WUA results.	E3.3.3-143
3.3.3-91.	Englebright Dam Hydrologic Zone rainbow trout adult, lamprey adult, and lamprey ammocoete WUA results.	E3.3.3-144
3.3.3-92.	Deer Creek Hydrologic Zone Chinook salmon WUA results.	E3.3.3-145
3.3.3-93.	Deer Creek Hydrologic Zone steelhead WUA results.	E3.3.3-146
3.3.3-94.	Deer Creek Hydrologic Zone rainbow trout adult, lamprey adult, and lamprey ammocoete WUA results.	E3.3.3-147
3.3.3-95.	Dry Creek Hydrologic Zone Chinook salmon WUA results.	E3.3.3-148
3.3.3-96.	Dry Creek Hydrologic Zone steelhead WUA results.	E3.3.3-149
3.3.3-97.	Dry Creek Hydrologic Zone rainbow trout adult and lamprey adult and ammocoete WUA results.	E3.3.3-150
3.3.3-98.	Daguerre Point Dam Hydrologic Zone Chinook salmon WUA results.	E3.3.3-151
3.3.3-99.	Daguerre Point Dam Hydrologic Zone steelhead WUA results.	E3.3.3-152
3.3.3-100.	Daguerre Point Dam Hydrologic Zone rainbow trout adult, and lamprey adult and ammocoete WUA results.	E3.3.3-153

List of Tables (continued)

Table No.	Description	Page No.
3.3.3-101.	Flows at the Marysville Gage and North American green sturgeon spawning WUA relationships (in pool morphological units) in the Yuba River downstream of Daguerre Point Dam.	E3.3.3-156
3.3.3-102.	Flows at the Marysville Gage and North American green sturgeon spawning WUA relationships (in all morphological units) in the Yuba River downstream of Daguerre Point Dam.	E3.3.3-156
3.3.3-103.	Amphibian species reported from the Project vicinity.	E3.3.3-159
3.3.3-104.	Summary of FYLF surveys and other information regarding the distribution of FYLF in the Middle Yuba River downstream of Our House Diversion Dam.	E3.3.3-164
3.3.3-105.	Summary of FYLF surveys and other information regarding the distribution of FYLF in the North Yuba River downstream of New Bullards Bar Dam at Site NYR-1.	E3.3.3-165
3.3.3-106.	Summary of FYLF surveys and other information regarding the distribution of FYLF in the Yuba River downstream of Middle Yuba/North Yuba Confluence at Sites YR-1, YR-2, and YR-2A.	E3.3.3-165
3.3.3-107.	Summary of FYLF surveys and other information regarding the distribution of FYLF in Oregon Creek downstream of Log Cabin Diversion Dam at Sites OC-1 and OC-2.	E3.3.3-166
3.3.3-108.	Summary of FYLF surveys and other information regarding the distribution of FYLF upstream of Project facilities on the Middle Yuba River, North Yuba River, and Oregon Creek.	E3.3.3-167
3.3.3-109.	Change in water surface elevations (ft) summarized by AOI region for the Middle Yuba River model domain.	E3.3.3-169
3.3.3-110.	Change in water surface elevations (ft) summarized by AOI region for the Oregon Creek model domain.	E3.3.3-169
3.3.3-111.	Summary of WPT basking surveys results.	E3.3.3-183
3.3.3-112.	Target Forest Service Sensitive mollusk species.	E3.3.3-187
3.3.3-113.	Water quality and habitat characteristics collected at six sites in the Yuba River downstream of Narrows 2 Powerhouse in July 2012.	E3.3.3-191
3.3.3-114.	BMI metrics from samples collected at six sites in the Yuba River downstream of Narrows 2 Powerhouse in July 2012.	E3.3.3-192
3.3.3-115.	BMI metrics from samples collected at Site 1: Hallwood Boulevard (RM 7) on July 19, 2012 compared to historical samples collected by SYRCL in 2006 and 2007.	E3.3.3-193
3.3.3-116.	Comparison of Water Quality Parameters Necessary for Mussel Invasion (Unable [red], Potentially Able [yellow], and Able [green]) with Measurements in New Bullards Bar Reservoir.	E3.3.3-194
3.3.3-117.	Facilities from which YCWA may release flow into a stream.	E3.3.3-203

List of Tables (continued)

Table No.	Description	Page No.
3.3.3-118.	Minimum Streamflows in cubic feet per second (cfs) for the Yuba River Development Project by month and Water Year type, which is defined in YCWA’s proposed Condition WR2.....	E3.3.3-209
3.3.3-119.	Percent of maximum WUA for rainbow trout adult, spawning and juvenile life stages in the Our House Diversion Dam Reach that correspond with YCWA’s proposed Condition AR1.	E3.3.3-210
3.3.3-120.	Simulated mean monthly flows (cfs) downstream of Our House Diversion Dam for the Middle Yuba River from Water Year 1970 through Water Year 2010.....	E3.3.3-211
3.3.3-121.	Percent of habitat that corresponds with YCWA’s proposed Project for all species and life stages as compared to the No Action Alternative in the Our House Diversion Dam Reach of the Middle Yuba River. Comparison made using all water years in the period of record.	E3.3.3-212
3.3.3-122.	Comparison of simulated mean monthly water temperatures in the Middle Yuba River downstream of Our House Dam (Our House Diversion Dam Reach) for the No Action Alternative and Proposed Project for WYs 1970 through 2010. Water temperatures greater than 20°C are highlighted in yellow for visual reference.	E3.3.3-214
3.3.3-123.	Comparison of simulated mean monthly water temperatures in the Middle Yuba River upstream of Oregon Creek (Our House Diversion Dam Reach) for the No Action Alternative and Proposed Project Alternative for WYs 1970 through 2010. Water temperatures greater than 20°C are highlighted in yellow for visual reference.....	E3.3.3-214
3.3.3-124.	Percent of maximum WUA for rainbow trout adult, spawning and juvenile life stages in the Log Cabin Diversion Dam Reach that correspond with the Log Cabin Diversion Dam flows shown in YCWA’s proposed Condition AR1.	E3.3.3-216
3.3.3-125.	Simulated mean monthly flows (cfs) downstream of Log Cabin Diversion Dam for Oregon Creek from Water Year 1970 through Water Year 2010.....	E3.3.3-218
3.3.3-126.	Percent of habitat under that corresponds with YCWA’s proposed Project for all species and life stages as compared to the No Action Alternative in the Log Cabin Diversion Dam Reach of Oregon Creek. Comparison made using all water years in the period of record.....	E3.3.3-219

List of Tables (continued)
Description

Table No.	Description	Page No.
3.3.3-127.	Comparison of simulated mean monthly water temperatures in Oregon Creek downstream of Log Cabin Diversion Dam (Log Cabin Diversion Dam Reach) for the No Action Alternative and Proposed Project Alternative for WYs 1970 through 2010. Water temperatures greater than 20°C are highlighted in yellow for visual reference.....	E3.3.3-222
3.3.3-128.	Comparison of simulated mean monthly water temperatures in Oregon Creek upstream of the Middle Yuba River (Log Cabin Diversion Dam Reach) for the No Action Alternative and Proposed Project Alternative for WYs 1970 through 2010. Water temperatures greater than 20°C are highlighted in yellow for visual reference.....	E3.3.3-223
3.3.3-129.	Percent of maximum WUA for rainbow trout adult, spawning and juvenile life stages in the Oregon Creek Reach that correspond with YCWA’s proposed Condition AR1.	E3.3.3-224
3.3.3-130.	Simulated combined mean monthly flow (cfs) downstream of Oregon Creek on the Middle Yuba River for the Yuba River Index water year types from Water Year 1970 through Water Year 2010.	E3.3.3-224
3.3.3-131.	Percent of habitat under that corresponds with YCWA’s proposed Project for all species and life stages as compared to the No Action Alternative in the Oregon Creek Reach of the Middle Yuba River. Comparison made using all water years in the period of record.	E3.3.3-225
3.3.3-132.	Comparison of simulated mean monthly water temperatures in the Middle Yuba River downstream of Oregon Creek (Oregon Creek Reach) for the No Action Alternative and Proposed Project Alternative for WYs 1970 through 2010. Water temperatures greater than 20°C are highlighted in yellow for visual reference.	E3.3.3-227
3.3.3-133.	Comparison of simulated mean monthly water temperatures in the Middle Yuba River upstream of the North Yuba River (Oregon Creek Reach) for the No Action Alternative and Proposed Project Alternative for WYs 1970 through 2010. Water temperatures greater than 20°C are highlighted in yellow for visual reference.	E3.3.3-227
3.3.3-134.	Percent of maximum WUA for rainbow trout adult, spawning and juvenile life stages in the New Bullards Bar Reach that correspond with YCWA’s proposed Condition AR1.	E3.3.3-228
3.3.3-135.	Mean monthly flows (cfs) downstream of New Bullards Bar Dam for the Yuba River Index water year types from Water Year 1970 through Water Year 2010.....	E3.3.3-228

List of Tables (continued)

Table No.	Description	Page No.
3.3.3-136.	Percent of habitat under that corresponds with YCWA’s proposed Project for all species and life stages as compared to the No Action Alternative in the New Bullards Bar Dam Reach of the North Yuba River. Comparison made using all water years in the period of record.	E3.3.3-229
3.3.3-137.	Comparison of simulated mean monthly water temperatures in the North Yuba River downstream of New Bullards Bar Dam for the No Action Alternative and Proposed Project for WYs 1970 through 2010.	E3.3.3-231
3.3.3-138.	Percent of maximum WUA for rainbow trout adult, spawning and juvenile life stages in the North/Middle Yuba River Reach that correspond with YCWA’s proposed Condition AR1.	E3.3.3-231
3.3.3-139.	Simulated mean monthly flows (cfs) in the NYR/MYR Reach for the Yuba River from Water Year 1970 through Water Year 2010.	E3.3.3-232
3.3.3-140.	Percent of habitat under that corresponds with YCWA’s proposed Project for all species and life stages as compared to the No Action Alternative in the Middle/North Yuba River Reach. Comparison made using all water years in the period of record.	E3.3.3-233
3.3.3-141.	Comparison of simulated mean monthly water temperatures in the Yuba River upstream of New Colgate Powerhouse for the No Action Alternative and Proposed Project for WYs 1970 through 2010. Water temperatures greater than 20°C are highlighted in yellow for visual reference.	E3.3.3-234
3.3.3-142.	Simulated mean monthly flows (cfs) downstream of the New Colgate Powerhouse for Water Year 1970 through Water Year 2010.	E3.3.3-235
3.3.3-143.	Percent of habitat under that corresponds with YCWA’s proposed Project for all species and life stages as compared to the No Action Alternative in the New Colgate Powerhouse Reach. Comparison made using all water years in the period of record.	E3.3.3-235
3.3.3-144.	Comparison of simulated mean monthly water temperatures in the Yuba River downstream of the New Colgate Powerhouse (New Colgate Powerhouse Reach) for the No Action Alternative and Proposed Project for WYs 1970 through 2010.	E3.3.3-237
3.3.4-1.	Special-status plant and mushroom species potentially occurring in the vicinity of Yuba County Water Agency’s Yuba River Development Project.	E3.3.4-3
3.3.4-2.	Special-status plants and mushrooms identified in the Yuba River Development Project study area.	E3.3.4-8
3.3.4-3.	Non-native invasive plants and other invasive species of concern to the Forest Service potentially occurring in the Project Vicinity.	E3.3.4-18

List of Tables (continued)

Table No.	Description	Page No.
3.3.4-4.	Non-native invasive plant occurrences identified on public land in the Yuba River Development Project.	E3.3.4-19
3.3.4-5.	Special-status, CESA-listed and fully protected wildlife with the potential to occur, or known to occur within 0.25 mi of the existing FERC Project Boundary.	E3.3.4-21
3.3.4-6.	Potential California Wildlife Habitat Relationship (CWHR) habitat types and acres disturbed by construction of the New Bullards Bar Dam Flood Control Outlet.	E3.3.4-71
3.3.5-1.	ESA-listed species occurring or potentially occurring in the Project Vicinity.	E3.3.5-4
3.3.5-2.	ESA-listed species that have a potential to be affected by the Project.	E3.3.5-6
3.3.5-3.	ESA-listed plant species potentially occurring in the vicinity of YCWA’s Yuba River Development Project.	E3.3.5-10
3.3.5-4.	Recorded occurrences of CRLF within 1 mile of the Yuba River Development Project FERC Project Boundary and other known occurrences in Yuba, Nevada, Sierra or Butte counties.....	E3.3.5-24
3.3.6-1.	Developed recreation facilities and undeveloped recreation sites at New Bullards Bar Reservoir.	E3.3.6-4
3.3.6-2.	Income and expenses for operations of Project recreation facilities from 2008 through 2012.	E3.3.6-6
3.3.6-3.	2012 Project recreation visitation in Recreation Days by type of facility, type of use and season.	E3.3.6-17
3.3.6-4.	Annual recreation use estimate projections through 2050 based on county population growth rates.....	E3.3.6-18
3.3.6-5.	Projected peak season occupancy, by day type, for the Project campgrounds through 2060.....	E3.3.6-19
3.3.6-6.	Projected peak season picnic area occupancy through 2060 by day type at Project picnic facilities.....	E3.3.6-20
3.3.6-7.	Current and projected peak season average occupancy levels for parking areas at Project boat launch facilities.....	E3.3.6-21
3.3.6-8.	Current and projected peak season average occupancy levels for parking areas at Project day-use facilities.....	E3.3.6-22
3.3.6-9.	Current and projected peak season average occupancy levels for parking areas at Project campground overflow parking areas.....	E3.3.6-23
3.3.6-10.	Peak number of boats-at-one-time, vehicles-at-one-time and camping units occupied in a day (2002-2012).....	E3.3.6-24
3.3.6-11.	Average, minimum and maximum BAOT and percent of boating capacity by day type for 2011 and 2012.	E3.3.6-25

List of Tables (continued)

Table No.	Description	Page No.
3.3.6-12.	Summary of angling locations, seasonality, constraints and success on the Project-affected river reaches.....	E3.3.6-38
3.3.7-1.	Summary of land ownership within the existing FERC Project Boundary by Project Development based on information provided by the County Assessor.....	E3.3.7-1
3.3.7-2.	Summary of county land within the existing FERC Project Boundary by Project Development based on the relicensing Geographic Information System database.	E3.3.7-2
3.3.7-3.	Distribution of public and private lands in Yuba County.	E3.3.7-2
3.3.7-4.	Yuba County zoning ordinance land use categories in the Project Vicinity.	E3.3.7-3
3.3.7-5.	Plumas National Forest (PNF) management area standards and guidelines for New Colgate Development facilities.	E3.3.7-7
3.3.7-6.	Tahoe National Forest (TNF) management area standards and guidelines for New Colgate Development facilities.	E3.3.7-7
3.3.7-7.	Yuba County Land Use designations for New Colgate Development facilities.	E3.3.7-8
3.3.7-8.	Yuba County Land Use Designations for New Bullards Bar Minimum Flow Development facilities.	E3.3.7-9
3.3.7-9.	Property management plans for Narrows 2 Development facilities.	E3.3.7-9
3.3.7-10.	Yuba County Land Use Designations for Narrows 2 Development facilities.	E3.3.7-10
3.3.7-11.	Primary Project Roads and Recreation Roads shown by road ID, length, width, surface treatment, and overall condition. ¹	E3.3.7-13
3.3.7-12.	Wildfires in the Yuba River Development Project Vicinity from 2003 through 2011.	E3.3.7-16
3.3.7-13.	Wildfires within the Yuba River Development proposed Project Boundary from 2003 through 2011.....	E3.3.7-17
3.3.7-14.	Wildfires outside of the proposed FERC Project Boundary from 2003 through 2011.	E3.3.7-17
3.3.7-15.	Fire occurrence analysis statistics by cause from 2003 through 2011.....	E3.3.7-19
3.3.8-1.	Project system features/facilities and NRHP eligibility.....	E3.3.8-18
3.3.10-1.	Summary of Yuba County population and housing units, 1960-2010 and 2012.....	E3.3.10-2
3.3.10-2.	Summary of Yuba County by age group, 2011.	E3.3.10-2
3.3.10-3.	Summary of household units and income in Yuba County and the State of California.	E3.3.10-3

List of Tables (continued)

Table No.	Description	Page No.
3.3.10-4.	Summary of population by gender and race in Yuba County and the State of California, 2011.	E3.3.10-3
3.3.10-5.	Summary of industry statistics for Yuba County, 2011.....	E3.3.10-4
3.3.10-6.	Summary of Sierra County population and housing units, 1960 – 2010 and 2012.....	E3.3.10-5
3.3.10-7.	Summary of population in Sierra County by age group, 2011.	E3.3.10-6
3.3.10-8.	Summary of household units, homeownership, home value, and income in Sierra County and the State of California.	E3.3.10-6
3.3.10-9.	Summary of population by gender and race in Sierra County and the State of California for 2011.	E3.3.10-6
3.3.10-10.	Summary of industry statistics for Sierra County, 2012.....	E3.3.10-7
3.3.10-11.	Summary of Nevada County population and housing units, 1960 – 2010, 2012, and 2013.....	E3.3.10-8
3.3.10-12.	Summary of population in Nevada County and California by age group, 2011.	E3.3.10-9
3.3.10-13.	Summary of household units, homeownership, home value, and income in Nevada County and the State of California.	E3.3.10-9
3.3.10-14.	Summary of population by gender and race in Nevada County and the State of California for 2011.	E3.3.10-9
3.3.10-15.	Summary of industry statistics for Nevada County, March 2013.....	E3.3.10-10
3.3.10-16.	Federal, State, and local agencies YCWA pays annually for Project-related services.	E3.3.10-12
3.3.11-1.	California and federal ambient air quality standards.	E3.3.11-2
3.3.11-2.	Attainment status for air quality pollutants in Nevada, Sierra and Yuba counties. ¹	E3.3.11-4
3.3.12-1.	Sierra, Yuba and Nevada counties’ noise standards.	E3.3.12-2
4.2-1.	Cost items common to No Action Alternative and YCWA’s Proposed Project Alternative.	E4-2
4.3-1.	Comparison of annual power benefits, costs net benefits between No Action Alternative and YCWA’s Proposed Project Alternative.....	E4-3
4.3-2.	Yuba County Water Agency’s estimated costs in 2013 dollars related to implementation of YCWA’s proposed conditions as part of continued operation of the Yuba River Development Project. All costs are rounded up to at least the nearest \$1,000 unless otherwise specified.....	E4-5
7.0-1.	Federal, State of California, and local agencies; Native American tribes; and members of the public with which YCWA consulted for the relicensing of the Yuba River Development Project.	E7-2

List of Volume II, Exhibit E Appendices

- Appendix E1 Reply to FERC Staff Comments on Draft License Application and Request for Study Modifications and New Studies
- Appendix E2 Yuba County Water Agency's Proposed Conditions and Associated Rationale Statements
- Appendix E3 Proposed Implementation Plans
- Appendix E4 Information Related to Proposed Measures
- Appendix E5 List of Contributors
- Appendix E6 Yuba County Water Agency's Operations and Water Temperature Models, Hydrology and Water Temperature Data, Technical Memoranda, Project Video and Maps
